

JITHESWARAN BHOOPAL

QUALITY AUTOMATION ENGINEER | SDET

Trivandrum, Kerala, India | +91-9080628254 | jitheswaran2091999@gmail.com

PROFESSIONAL SUMMARY

Quality Automation Engineer with 5+ years of experience across API and UI test automation, CI/CD integration, and large-scale regression testing (22,000+ test cases) in credit-reporting and financial-services domains. Proven track record building Java-based automation frameworks (Selenium, Playwright, REST Assured, Cucumber) and driving AI-augmented QA initiatives — including self-healing test locators and LLM-based failure triage — to cut maintenance overhead and accelerate release velocity. Skilled at partnering with cross-functional teams in Agile environments to deliver reliable, production-grade test coverage.

CORE SKILLS

Languages	Java, Object-Oriented Programming (OOP)
Test Automation	Selenium WebDriver, Playwright (Java), JUnit, TestNG, Cucumber (BDD)
API Testing	REST Assured, Postman, Bruno
CI/CD & Build Tools	Jenkins, GitHub Actions, Maven
Cloud Platforms	Google Cloud Platform (GCP), Microsoft Azure
AI-Augmented QA	GitHub Copilot Enterprise, Anthropic Claude SDK, Self-Healing Locators
Tools & Reporting	GitHub, JIRA, MySQL, Allure Reports
Methodologies	Agile / Scrum, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Quality Automation Engineer — Consumer Credit Report Generation

Equifax Analytics Pvt. Ltd.

Nov 2023 – Present

Trivandrum, India

- Own API and UI test automation for a regression suite of 22,000+ test cases supporting a global credit bureau's consumer credit-reporting platform, ensuring release quality across frequent production deployments.
- Integrate manual test cases into Jenkins-based CI/CD pipelines on Google Cloud Platform (GCP), reducing manual regression effort and accelerating release cycles under Agile delivery.
- Architected a Java-based Cucumber report-diff tool (using zjsonpatch) to validate response parity between legacy and unified APIs across the full 22,000+ test regression suite, supporting a company-wide API consolidation initiative.
- Leading the migration of the test automation framework from Selenium + Cucumber + Maven to Playwright (Java) to improve test stability, execution speed, and long-term maintainability.
- Designing an AI-augmented QA roadmap built on GitHub Copilot Enterprise — including self-healing locators and dynamic test-data resolution — to reduce flaky-test maintenance overhead.
- Building an Agentic QA Failure Analyser: an AI-driven failure-categorization tool integrating the Anthropic Claude SDK with pytest hooks and Allure reporting to automatically triage regression failures for faster root-cause analysis.

Tester III — Mainframe to Cloud Migration

PTEC (a subsidiary of UST Global)

Sep 2023 – Nov 2023

Trivandrum, India

- Performed API testing and validation for a mainframe-to-cloud migration program using Bruno, Postman, and CI/CD pipelines to verify functional parity between systems.
- Managed test artifacts, defects, and database validation using GitHub, JIRA, and MySQL across the migration lifecycle.
- Applied REST Assured, Java, and Test-Driven Development (TDD) within an Agile framework, improving testing efficiency and defect-detection rates.

Test Engineer — MT to MX Migration (Cross-Border Payments)

Wipro Limited

Jul 2021 – Sep 2023

Chennai, India

- Developed and executed automated test scripts validating the migration of cross-border payment messaging from MT to MX formats, specializing in SEPA and CHAPS payment schemes.
- Partnered with cross-functional engineering and business teams to triage and resolve defects, contributing to test strategy for high-volume, mission-critical payment systems in a regulated financial-services environment.

CERTIFICATIONS

- Google — Generative AI Leader (Dec 2025)
- Microsoft Certified: Azure Fundamentals (Nov 2022)

EDUCATION

B.Tech — Sri Manakula Vinayagar Engineering College | 2017 – 2021 | CGPA: 8.5/10 | Languages: English, Tamil
